SUMMARY

Aspiring **Data Analyst** with practical experience in **SQL**, **Python**, **Power BI**, and **Excel** gained through end-to-end analytics, dashboarding, and **machine learning** projects. Proficient in **data analysis**, **visualization**, and business intelligence, with a proven ability to derive insights from data and present them effectively. Eager to contribute analytical and problem-solving skills to data-driven decision-making.

EDUCATION

Indira Gandhi National Open University — Delhi, IN
Masters of Commerce — *Jan. 2022 – Jan. 2024*

College Of Vocational Studies, DU — Delhi, IN
Bachelors of Commerce — *July 2018 – June 2021*

SKILLS

SQL: MySQL, PostgreSQL, Joins, Subqueries, CTE, Window Functions, Aggregations, ETL.

Python: Python, Pandas, NumPy, Data Cleaning, Data Manipulation, Exploratory Data Analysis (EDA).

Power BI: DAX, Data Modeling, Power Query, Dashboard Development, KPI Reporting.

Data Visualization: Power BI, Tableau, Matplotlib, Seaborn, Plotly, Streamlit.

Excel: Pivot Tables, Pivot Charts, XLOOKUP, INDEX-MATCH, Conditional Formatting, Data Validation.

Machine Learning: Scikit-learn, Regression, Feature Engineering, Model Training, Model Selection.

PROJECT EXPERIENCE

Flipkart Product Analysis | Github↗ — *Mar 2025 – Apr 2025*

- Organized, cleaned, & validated large product and seller datasets using **Excel** to ensure accurate analysis and reporting.
- Analyzed product sales, pricing, discounts, seller performance, inventory, and return policies using **PostgreSQL** by creating 8 analytical **SQL views**.
- Designed interactive **Power BI dashboards** with KPI cards, slicers, and visualizations to monitor product performance, category sales, ratings, and inventory status.
- Performed data validation and quality checks to improve reporting accuracy across the analytics workflow.
- Generated actionable business insights by identifying top-selling products, high-performing sellers, discount trends, and low-stock products through structured data analysis.

Cloud Kitchen Financial Dashboard | Github↗ | Dashboard↗ — *May 2026 – Jun 2026*

- Developed an interactive **financial analytics dashboard** using **Python, Streamlit, Pandas, and Plotly,** to monitor Revenue, EBITDA, Gross Margin, Orders, and Store Performance across multiple cloud kitchen stores.
- Created interactive visualizations to analyze monthly trends, city-wise revenue, and store-level financial performance.
- Improved reporting efficiency by **automating** data processing and dashboard updates.
- Automated Excel-based reporting and enabled CSV/Excel data export to support analysis and decision-making.

California Housing Price Prediction | Github↗ | Notebook↗ — *Apr 2026 – Jun 2026*

- Performed data cleaning, exploratory data analysis (**EDA**), **feature engineering,** and model evaluation.
- Improved data quality by implementing **machine learning-based missing value imputation**.
- Trained and compared multiple regression models including **SGD Regressor**, **Random Forest**, and **XGBoost**, with **LightGBM** achieving the best predictive performance.

ACHIEVEMENTS

- Earned **5-Star Gold Badge** in HackerRank SQL by solving **100%** of all SQL challenges.
- Solved **100%** of LeetCode Pandas challenges.
- Earned HackerRank SQL Certifications (**Basic, Intermediate, & Advanced**) by passing SQL skill assessments.
- Secured **1st position** in academics in both Class 11th and 12th.

WEBSITES

- **LeetCode | Profile↗**
- **HackerRank | Profile↗**
- **StrataScratch | Profile↗**
