PROFILE SUMMARY

Aspiring **Data Analyst** with practical experience in **SQL**, **Python**, **Power BI**, and **Excel** gained through end-to-end analytics, dashboarding, and **machine learning** projects. Proficient in data analysis, visualization, and business intelligence, with a proven ability to derive insights from data and present them effectively. Eager to contribute analytical and problem-solving skills to data-driven decision-making.

SKILLS

- **SQL**: Joins, Subqueries, Aggregations, Window Functions, CTE, MySQL, PostgreSQL
- **Programming**: Python, Pandas, NumPy
- **Visualization**: Power BI, Tableau, Matplotlib, Seaborn, Plotly, Streamlit
- **Machine Learning**: Scikit-Learn, Regression, Feature Engineering, Data Cleaning, Model Training and Selection
- **Tools**: Microsoft Excel, ETL

PROJECTS

Flipkart Product Analysis (MAR 2025 - APR 2025) | Tools: Excel, SQL, Power BI | Github↗

Problem Statement: To analyze product sales, pricing trends, and seller performance on Flipkart to identify profitable segments and improvement areas.

Key Insights:

- Identified top-performing product categories and high-discount segments driving sales.
- Found key sellers contributing over **60%** of total revenue.
- Developed **KPIs** to track rating distribution and low-stock items across categories.

Cloud Kitchen Financial Dashboard (MAY 2026 - JUN 2026) | Tools: Python, Pandas, Streamlit, Plotly | Github↗ | Dashboard↗

Problem Statement: Develop an interactive financial dashboard to monitor Profit & Loss performance across cloud kitchen stores and cities.

Key Insights:

- Built a fully interactive dashboard with dynamic filters for city, store, month, revenue cohort, and EBITDA range.
- Created KPI cards for Revenue, EBITDA, Orders, and Store Count with real-time updates.
- Developed interactive visualizations including donut charts, trend analysis, scatter plots, and revenue comparisons.

California Housing Price Prediction (APR 2026 - JUN 2026) | Tools: Python, Pandas, Scikit-Learn, Matplotlib | Github↗ | Notebook↗

Problem Statement: Build a machine learning model to predict California housing prices using demographic and geographic features.

Key Insights:

- Performed data cleaning, exploratory data analysis, and feature engineering.
- Implemented machine learning-based missing value prediction for improved data quality.
- Compared multiple regression models including SGD Regressor, Random Forest, XGBoost, and LightGBM, selecting LightGBM as the best-performing model.

ACHIEVEMENTS

- Earned **5-Star Gold Badge** in **HackerRank SQL** by solving **100% of all SQL challenges.**
- Solved **100%** of **LeetCode Pandas challenges**.
- Earned **HackerRank SQL** Certifications (Basic, Intermediate, & Advanced) by successfully passing standardized SQL skill assessments.
- Secured **1st position** in academics in Class **11th** and **12th.**

CODING & ANALYTICS PROFILES

- **LeetCode | Profile↗**
- **HackerRank | Profile↗**
- **StrataScratch | Profile↗**

EDUCATION

Master of Commerce (M.Com) – IGNOU, Delhi — 2021 - 2024

Bachelor of Commerce (B.Com) – College of Vocational Studies, DU — 2018 - 2021

Senior Secondary School (Class XII) – Sarvodaya Kanya Vidyalaya, New Delhi — 2017 - 2018
